Respectfully submitted,

Samuel P. Philbrick, } Selectmen
James C. Hill, } of
Albert A. Smith. } Belmont.

We have carefully examined the foregoing account and find it properly cast and vouched.

CHARLES E. SMALL.
JOHN P. WILLARD.
Auditors.

WATER WORKS.

RULES AND REGULATIONS.

Annual Rate.—The following rates are established until further notice, and to be paid by owner of property where water is taken:

Family not exceeding 5 persons, 1 faucet,	$6 00
Each additional person, same family,	50
Bath-tub or water-closet, of approved pattern,	3 00
Hose for washing windows or carriages, or sprinkling lawns, not exceeeing 1 hour per day, thro' 1-8 nozzle,	3 00
Builders rates per bbl.,	05

Hotels, steam-engines and motors, metre or special rates.

When water is used for purposes not specified in the foregoing it may be drawn through a metre or a rate will be fixed by the Superintendant upon application.

Metre Rates.—Not exceeding 24,000 gallons per year $10.00; Each additional 1,000, 25 cts.

Contract.—Every person taking water thereby consents to the following regulations, and agrees to be bound by them and such other regulations as the Selectmen and Superintendent may hereafter establish.

Application.—All persons desiring to take water shall make application to the Superintendent, stating fully and truly all the purposes for which it is to be used; and should additional use at

any time be required the person requiring the same must notify the Superintendent before such additional use will be allowed.

Service Pipes.—The town will furnish a corporation with a stop, from the main pipe. All service pipe must be provided and maintained by the person supplied with water. Persons taking water must keep their own water pipes and fixtures connected therewith in good repair and protected from frost at their expense. They must provede a stop and waste cock, to be properly located inside the building and have the pipes so arranged that the water can be drawn from them whenever and wherever there is any danger of freezing.

Use of Water.—The water at sinks and other places must not be left running to prevent water in pipes freezing, or for any other purpose; and all necessary waste of water must be prevented. No owner or tenant will be allowed to supply water to other persons or families, and if found so doing the supply will be stopped and the water rent already paid forfeited.

Inspection.—The Superintendent must have free access at all proper times to all parts of the premises where water is delivered and consumed.

Stoppage.—No person shall open or close any public fountain, hydrant stop-cock, water gate, blow-off or air vent, attached to any water pipe belonging to the town except by permission of the Superintendent. Provided, however, tha this shall not apply to firemen while in the proper discharge of their duties. The town reserves the right to shut off the water for making repairs, extensions or other purposes without notice, and no person shall be entitled to damages by reason of such action of the town.

Bills Payable When.—All water bills may be payable semi-annually in advance, to the Superintendent on the first day of June and December. If water rents be not paid within fifteen days after they become due, the flow of water may be cut off, and one dollar will be charged for turning it on again. Water rents will commence when service pipe is laid.

Respectfully submitted.

Samuel P. Philbrick,
James C. Hill
Albert A. Smith
} Selectmen of Belmont.

SCHOOL REPORT.

To the Legal Voters in the Town of Belmont.

It was your pleasure to entrust your schools to our management and we have endeavored, during the year now closing, to discharge this trust in a faithful and impartial manner. It has been our purpose to comply with the school laws, both in letter and spirit, by pursuing in all cases that course which seemed to us best under the circumstances, as we understood them.

We will try in this report to place before you such facts concerning your schools as will enable you to judge of their character and standing; and will also make such suggestions as appear to us wise in regard to the best course to pursue in the future.

All the schools included in the last report have been retained, and in addition one term has been taught in Lower Province Road to accommodate children who had moved into that neighborhood. The spring term in the Plummer, was shortened by an accident to the teacher; the winter term both in the Plummer and Jamestown were shortened in consequence of diphtheria, and the winter term in Upper Province Road closed prematurely on account of unsatisfactory work of the teacher, and the small attendance.

It appears just and proper that the districts which have not had a full school year should have longer terms the coming year wherever conditions will admit.

In 1890 we had but twenty weeks of schooling; the ten additional weeks that we now have must be in winter, a season not propitious for this purpose. It has sometimes been necessary to close a school (usually a winter term) on account of the small attendance, a condition which was the result of untoward circumstances, rather than the fault of either teacher, parents or scholars. Scholars are a prerequisite of a school. Our winter terms are deranged and seriously handicapped by inclement weather and poor roads; and the persentage of attendance is always low. "Make hay while the sun shines," is a trite saying. The moral to be drawn from all this is: make strenuous efforts to have your children in school every minute of each day it is in session during the spring and autumn terms then improve whatever you can with safety, of the winter term. This is especially applicable to rural districts. We feel justified in saying that, as a whole, the schools have been prosperous and now stand upon a higher plane of excellence than at the commencement of the year; and that they give promise of better work in future terms. There have been thirty weeks of schooling; we regret that there could not have been more, but the increased cost of fuel, a term in Lower Province Road that cost $52.00, and $109.00 used in paying a male principal in the Village, over what a female had formerly cost prevented. Most of our scholars have been regular in attendance,

and consequently have made good progress; some, however, have without cause, been irregular; in fact have manifested an utter disregard for the compulsory school laws; and as a result the truant officer thought it best to prosecute in one case, but the remission of the fine prevented the desired effect, and no reform followed in this or any other case. Scholars who are irregular, usually think they should remain in their classes, and their parents object to their being dropped. A serious derangement of classes results and much additional work is imposed on the teachers. Some teachers are apt in devising ways and means to induce regular and punctual attendance in their pupils, others are not. Other things being equal, the former are the most desirable teachers to employ. Whenever the persentage of attendance in any school is low, the teacher, as well as the superintendent, should look for the cause, and try for a reform. You may secure the best teachers in the world, and the most energetic truant officer, and pass the most stringent school regulations, but your schools will never be what they should be until the citizens themselves take an active personal interest in them. There is an increasing demand for vocal music in our schools. A knowledge of music is in itself an education; and the practice of it in school serves to fix and hold the attention, induces obedience and promptness in action, and is a source of refinement. It appears to us that it is a necessity that cannot long go unheeded, and might properly receive your early attention. Some years ago by-laws were adopted by the district, but as they were not recorded by the clerk they are inoperative. A set of by-laws will be presented for your consideration at the coming school-meeting. Persons who have visited the Union school house must have noticed the old fashioned benches which the scholars have to use, while every other school room in town is furnished with modern desks. We also call attention to the Plummer school house and its need of paint. An appropriation is needed for these two cases. During the year at least twelve pupils from the town have attended high schools in other towns at an aggregate expense of $400.00. In addition to this it must have cost private individuals about $500.00 for board and car-fare; meanwhile there are those among us who are obliged to smother their longings for a higher education because they are unable to incur the expense of attending school away from home although their tuition may be paye l by the town. The law compelling towns that have no high-school, to pay the tuition of those who attend such schools in other towns is not available for them. These facts suggest the query : Why not have a high school at home? For other information concerning your schools we refer you to the annexed statistical table.

Thanking you for your courtesy, and many acts of friendliness we submit this our report for your consideration.
